Downloads the
user's current
lease file.

Basically goes to a page
similar to the "Register"
page that allows the
user to enter new lease
info. This new lease info
will also need to be
verified by a human.

Allows user to
select a utility bill.
These are
collected for
detecting trends
in usage across
the building.

Data Visualizations

Approve User Accounts

We'll need some sort of data visualization library to plot data. At the very least, an image of a graph can be created in Python, then displayed.

Each of these would take the user to an accompanying page that has the specific admin tool.
